

- ① core elements of data center Infrastructure
- ② logical volume manager
- ③ components of Disk service drive
- ④ RAID
- ⑤ Logical Block Addressing
- ⑥ Zone bit recording
- ⑦ Interface protocols
- ⑧ storage provisioning
- ⑨ Types of ISS
- ⑩ mapping user files to Disk storage
- ⑪ Disk Drive components.

2-mans

- ① Define Information
- ② Distinguish server centric & information centric
- ③ what do you mean by host?
- ④ Differentiate structured & unstructured data

⑤ Define RAID

⑦ List out core elements in Data center

⑧ Limitations in magnetic tape

⑪ Define seek Time

⑫ Read hit, Read miss

⑬ Global cache

⑭ Dedicated cache

⑮ Components of JSS

⑯ outline LVM terminology.

⑰ outline features of traditional provisioning
versus virtual provisioning

⑱ find total no of blocks available if the
drive has eight sector per track,
eight head and four cylinders

Refer page no.: 36

⑲ Define Rotational latency -
